

# HSE mission

In COSMI we pursue business in compliance with ethical values in which we deeply believe.

These values include the absolute protection of the health and safety of our employees and collaborators, respect for nature and the environment in which we operate and compliance with the laws and any agreements on the subject with the interested parties.

In accordance with these values we have designed our HSE mission for the future, which can be summarized as follows:

- #1. We will always pursue the goal of ZERO ACCIDENTS. This is the challenge of excellence to which we are called, together with our business partners
- #2. We will focus on developing the preventive effectiveness of the management system
- #3. We will keep our focus on eliminating hazards and reducing risks at all levels
- #4. We will give more and more importance to education and training
- #5. We want workers to be protagonists of safety, encouraging them to detect the hazards of their workplace and reward them for the simple and effective proposals and solutions they eventually find to eliminate danger or reduce risk
- #6. We will take care of influencing our business partners to pursue excellent results.

All of our management will be at the forefront of this challenge to lead the way, with personal commitment and the necessary resources.

In COSMI we are determined to protect the safety of workers and to safeguard nature!
